### ● 产品概述

CKV系列单向阀结构紧凑，适用于仪表板和仪表系统。在系统中能够执行精确的操作，CKV系列阀门为常闭式止回阀，当入口和出口之间压力差高于弹簧的设定压力时，该阀门内的弹簧加载后将塞头向后移动，形成一个通道，液体可以通过。

### ● 产品特点

- 结构紧凑，体积小，外形美观
- 零件为通用件，具有互换性
- 可调节的固定启流压力弹簧
- 压力最高可达6000PSI ( 413bar )
- 结构材料316不锈钢或黄铜可选
- 多种端接形式和连接方式自选

### ● Product Description

With the compact structure, CKV series non-return valve is applicable for instrument panels and systems, which can be operated accurately. CKV series valves are usually used as check valves of normally closed type. When the drop pressure between the inlet and the outlet is higher than the set value of the spring, the spring inside the valve would move the plug afterwards to form a channel for passing through.

### ● Product Features

- Compact structure, small size & beautiful appearance
- The components are all of common type and can be interchangeable.
- Spring with fixed opening pressure can be adjusted.
- The pressure can be up to 6000 psi (413bar)
- Materials 316SS & brass can be selected.
- Multiple end connections for selection.

## ● CKV-B1.B2

对于一段时间未启动过的阀，初始开启压力可能大于设定的开启压力。

For those valves not used for a long time, the starting opening pressure would be more than the opening pressure set.

## ● 密封材料 (所有系列) Sealing Material (for all models)

316不锈钢阀中，碳氟FKM O形圈是标准配置。黄铜阀中丁腈橡胶O形圈是标准配置，可供其他弹性体密封件（提动头粘结材料和O形圈）。需订购时在阀门基本订货号中插入密封材料代号。

FKM o-ring is the standard component for 316SS valves. NBR o-ring is the standard component for brass valves. Also some other kinds of sealing materials with elastomer (caking materials for lifting head and o-ring) can be selected. Please make special description while ordering if special sealing material is needed.

| 密封材料<br>Sealing Materials | 代号<br>Code | 温度等级<br>Temperature Class |
|---------------------------|------------|---------------------------|
| 丁腈材料 NBR                  | -BU        | -10~250 (-23~121)         |
| 乙烯丙烯 PP/PE                | -EP        | -50~300 (-45~148)         |
| 碳氟FKM                     | -V1        | -10~375 (-23~190)         |
| 氯丁合成橡胶 Neoprene           | -NE        | -40~250 (-40~121)         |

## ● 特种合金(所有系列) Special Alloy(for all models)

许多阀体可由其它合金材料制成，订购时在基本订货号前添加特种合金代号。

Valve body can also be made of some other special alloy. Please add the code of the special alloy to the basic order information while ordering.

### 订购数据 Order Data

### CKVB2型

要订购时，在基本订货号后面添加开启压力代号。  
Add the opening press code in front of the basic order number.

| 开启压力<br>Opening Pressure psi (bar) | 代号<br>Code |
|------------------------------------|------------|
| 3~50(0.21~3.5)                     | 3          |
| 50~150(3.5~10.4)                   | 50         |
| 150~350(10.4~24.2)                 | 150        |
| 350~600(24.2~41.4)                 | 350        |

## ● TCKV系列提升单向阀 TCKV series Lifting Non-return Valve

扬中新亚提升单向阀在压力6000psig (413bar) 和温度900 (482°C) 以下能抑制反向流动。

正向流动能提起提动阀芯，将阀打开。反向流动使提动阀芯落在孔口上，将阀关闭。

提升单向阀是依靠重力来动作的，故必需水平地安装，阀帽螺母在上部。

The valve should be installed horizontally with the cap and nut on the top because the valve is functioned with the gravity.

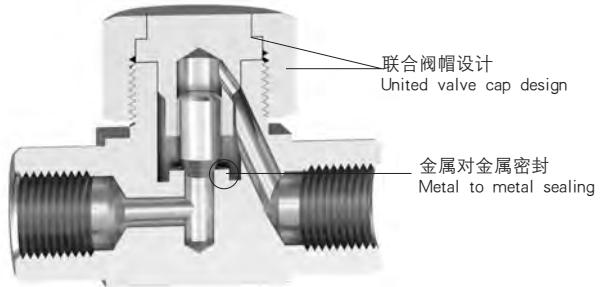

The lifting non-return valve supplied by Yangzhong Xinya can hold down the reversed flowing under the pressure of 6000psig with the temperature of 900 (482°C). The valve would be opened with the positive flowing by lifting the valve core and it would be closed with the reversed flowing by falling the valve core down on the hole.

## ● 特点 Features

- 结构坚固，全不锈钢结构 hard structure all made by stainless steel
- 反向流动系数的0.1% 0.1% of the reversed flowing coefficient
- 无弹簧或弹性体 without spring or elastomer
- 尺寸紧凑 compact size

联合阀帽设计 United valve cap design

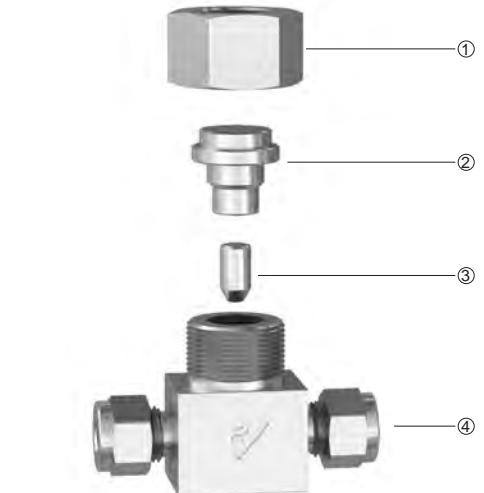

金属对金属密封 metal to metal sealing

## ● 压力-温度等级 Pressure-temperature
